

• HOME ENERGY EFFICIENCY CHECKLIST

ANNUALLY:

- Check your heat and A/C systems.
- Check windows and outside doors for drafts.

SEASONALLY:

- Check furnace switch, fuse and breakers.
- Check furnace blowers, oiling motor and changing belt if necessary.
- Check thermostat accuracy by taping thermometer to wall next to it. if discrepancy, have serviceman re-calibrate unit.
- Check central air condensing unit for obstructing leaves and debris, and hose out if necessary.
- Keep shrubs pruned back to maximize airflow.
- Check room A/C condensate drain outlet for plugging.

MONTHLY:

- Check and clean/change room A/C filters.
- Check room A/C condenser coils and intake vents for obstructions.
- Check furnace filter and change if clogged.

GENERAL:

- Check insulation for type/thickness, beginning in attic/top floor. Upgrade if inadequate.
- During humid weather, check central A/C condensate drain to ensure it is carrying off excessive moisture.
